

# UT Southwestern Frisco

Orthopaedic Surgery and Sports Medicine

The Orthopaedic Surgery team at UT Southwestern Frisco offers innovative surgical and medical options for patients who have injuries and disorders of the musculoskeletal system. We apply a multi-disciplinary approach to evaluate and treat all types of orthopedic conditions and injuries.

For most of the situations we treat, surgery is not our initial approach. If surgery is necessary, we use the most advanced techniques available to help patients. Our surgeons are experts in innovation, including minimally invasive techniques, which often help patients recover quickly. We are committed to providing the highest quality of patient care and to collaborating with referring physicians to achieve optimum results.

All surgical services requiring anesthesia take place at UT Southwestern's partner site – Texas Health Hospital Frisco – located right next door.

**To refer a patient, call 214-645-8300 or fax 214-645-7999.**
